**OBJECTIVE** With a strong commitment to continuous learning and teamwork, I am eager to leverage my skills in problem-solving, innovation, and collaboration to design impactful tools that enhance user experiences.

**EDUCATION** *Bachelor of Computer Science,* August 2012 - May 2016  
Western Carolina University, Cullowhee, NC

**TECHNOLOGY SKILLS** *Programming Languages and Tools:* Ruby on Rails, React, Typescript, Java, SQL, NodeJS, HTML, CSS, AWS, and Docker.

*Software Engineering:* Agile methodologies, Git, CI/CD, a11y accessibility, and SOC 2 compliance.

**WORK EXPERIENCE** *Software Engineer* February 2022 - March 2025  
Soomo Learning, Asheville, NC

- Created and maintained a suite of microsites using React that interact with a Rails core monolith.
- Designed and implemented admin-facing Customer Service tools to make user data easier to manage and create.
- Designed and implemented student-facing features to maximize engagement and accessibility while also maintaining student annotations and analytics.
- Analyzed and implemented SOC 2 security requirements.

*Software Engineer* August 2017 - February 2022  
MIB, Braintree, MA

*Formerly 'Paperless Solutions Group', Gainesville, FL*

- Created and maintained websites built using HTML, CSS, Javascript, React, TailwindCSS, and Java.
- Maintained AJAX powered backends using Apache Tomcat, Maven, and SQL.
- Created and maintained a production build process used for projects using both React and Maven in combination with ViteJS hot-reloading for a better developer experience.

*Staff Software Developer* May 2017 - August 2017

*Associate Software Developer* May 2016 - May 2017

SCI Fusion360, Charlotte, NC

- Worked within an existing IBM payment processing Java monolith to create a new payment processing app for banks.
- Designed and developed a suite of RESTful API endpoints to handle user creation, payment processing, and more.
